Subject: Submission of Test Report based on trial over the Point to Multipoint equipment in 26/28GHz band

Reference: PTD ref. 700-SaNya/Kwe(7)Resource/1541 dated February 21, 2020

Dear Sir,

Telenor Myanmar Limited (TML) has been approved in making trial over the Point to Multipoint equipment at two frequency channels in 26/28GHz band for the backhauling and testing new technology for higher bandwidth requirement in terms of current and future demand, referring to the letter received from the Posts and Telecommunications Department (PTD). In addition, TML has been informed to report the test results as well by describing use case, parametric analysis, benefits and inferences.

TML has enclosed documents related to test process and results for trial conducted in Yangon for your kind reference.

Should you require any further enquiries, please do not hesitate to ask us more.

Best Regards,

Mya Thwin, SVP, Head of Regulatory Strategy,
Signing on behalf of Jon Omund Revhaug,
Chief Executive Officer, Telenor Myanmar Limited
