

# ROAD TO 5G - TELENOR

Ei Theingi  
VP, Head of Network & Architecture  
Telenor Myanmar

# the transformative power of mobile

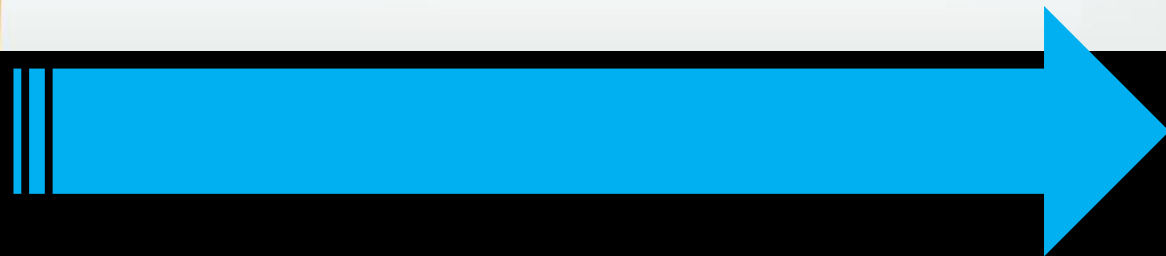

A young woman with long dark hair, wearing a dark blue scarf and a patterned jacket, is smiling while looking at a tablet computer. She is standing on a city street at night, with blurred city lights and buildings in the background. The scene is illuminated by a cool blue light, with some warm yellow lights from the city in the distance.

5G is an evolution of 4G and also enabling  
new business opportunities

**advancing society**

intelligent

5G is on the horizon

partnering

# Our commitment

connect customers to  
what matters most

**5G = evolution; not revolution**  
**Will not happen overnight**

**Exploring 5G  
opportunities through  
trials, collaborations**

**5G's potential is great; will  
eventually enable increased,  
more reliable connectivity**

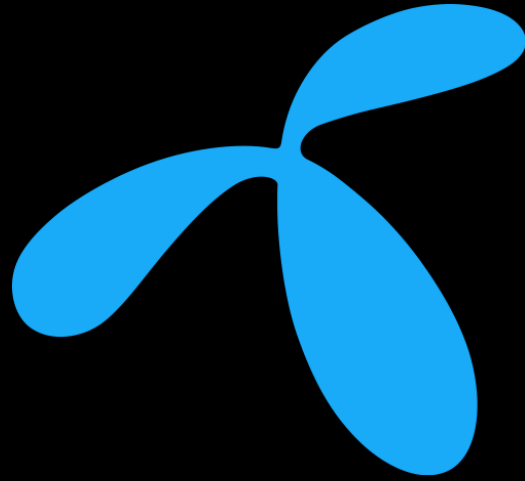

**5G pathway will not be the  
same across our markets**

**Key to modernising our networks  
and increasing efficiency**

**Potential for business opportunities  
beyond mobile broadband**

**Investing in 5G when  
commercially attractive;  
benefits customers**

THANK YOU.
